

SCHOOL MISSION AND VISION STATEMENTS

THE MISSION

The mission of our school is to encourage and motivate students to develop into high-minded, ethical, well-educated and compassionate individuals who are ready to face the challenges of the modern world and willing to make a substantial and valuable contribution to society.

THE VISION

The vision of our school is primarily focused on ensuring a high-quality teaching process which entails the use of contemporary and top-notch teaching methods and resources. Our principal aim is to direct attention to interconnecting different subjects and thus encourage learning by providing practical and illuminating examples. This boosts creativity, fosters the development of logical and critical thinking in students, and enables the acquisition of functional knowledge that they will be able to use in everyday life. Students and teachers should work as a team and their relationship should be based on tolerance and flexibility. Only in this way will they be able to fulfil their common and ultimate goal and achieve the best possible results.

The School Mission Statement has not changed since the authorization process.
